Summary

Computer Engineering student with a strong passion for game development, bringing creativity and dedication to every project. Skilled in Unity 3D and 3D game mechanics, with hands-on experience in building story-based and interactive games. Worth contributing strong problem-solving abilities, creative thinking, and a keen interest in learning new game design techniques. Eager to continuously improve skills and add value to innovative and creative game development projects.

Education

Bachelor's Degree in Computer Engineering | Gujarat Technological University — Aug 2023 – Present
Pacific School Of Engineering, Surat — Current CGPA: 8.78

Projects

1. Heart Of The Maze | *PC Game* — *13th Aug – Present*
- Survival Horror: Explore a zombie-infested maze to find the antidote.
- Puzzle Challenges: Solve 8 unique mazes, defeat guardians, and collect map fragments.
- Dynamic Maze: All 8 maze layouts change every night, creating unpredictable gameplay.

2. Internship Project (Andhkaar – Trial of the Yodha) | *PC Game* — *July 2nd – 5 Aug*
- Mythological Adventure: Explore cursed temples inspired by Indian mythology.
- Puzzle & Exploration: Solve light-based puzzles and collect sacred relics.
- Epic Combat: Battle powerful Asuras to restore divine light.

3. S.T.E.M Game Jam (Karmayudh – The War of Echoes) | *PC Game* — *July 11th – 25 July*
- Story-Driven Combat: Fight enemies across three lives in a journey of karma and redemption.
- Adaptive Echo AI: Battle echoes that learn and replicate your own combat style.
- Cinematic Gameplay: Experience intense boss fights and dynamic sword combat focused on self-reflection.

4. Zatun Zombie Game (The Last Containment) | *PC Game* — *April 2026 – May 2026*
- Developed a production-ready Third-Person Zombie Survival Shooter in Unity 6 featuring advanced combat and enemy AI systems.
- Engineered a hybrid Hitscan-Projectile shooting system with reliable hit detection, weapon handling, and combat feedback.
- Implemented IK-driven procedural animation rigging for realistic weapon aiming, head tracking, and character interactions.

5. Legacy of Dharma – The Rise of Deva | *PC Game* — *June 2024 – May 2026*
- Developed a 3D story-based action game using Unity, inspired by Indian mythology.
- Focused on narrative-driven gameplay, strategic combat mechanics, and immersive environment design.
- Involved in game design, level design, and story writing for Deva vs Asura storyline.

6. The Secret Book | *Zimension Website* — *Aug 2025*
- Designed a mystery adventure puzzle game set in a hidden cave environment.
- Created 4 unique puzzles involving exploration, logic, and relic discovery.
- Achieved 2nd position in GameJam Hackathon conducted on the Zimension platform.

7. Swadeshi UnderDogs | *PC Game (Unity 3D)* | *Status: Completed* — *2024*
- Created an innovative 3D exploration game combining educational content with engaging gameplay.
- Featured unique cat protagonist perspective during village exploration in a Diwali festival setting.
- Integrated math and physics-based puzzles directly into environment for seamless learning experience.
- Demonstrated blend of cultural storytelling with educational game design.

Courses & Certificates

- SAP Code Unnati Advance Program — July 2025 – March 2026
- Unity Engine Course — Aug 2025 – Sept 2025
- SAP Code Unnati Foundation Program — July 2024 – Feb 2025
- Solar Ambassador Workshop Certificate (Energy Swaraj Foundation) | Practical solar energy training
- National Unity Quiz Certificate (MyGov Platform) | Government of India initiative
- Drama Performance Certificate (Anand Charusat University) | Horror-comedy drama production

Achievements

- 2nd Prize Winner – GameJam Hackathon (Zimension Platform, August 2024) | Ranked 2nd among 300+ national teams
- Carrom Champion (Team Event) | Sports Week 2026 | Won doubles competition defeating multiple teams
- Carrom Runner-up (Solo Event) | Sports Week 2026 | Achieved 2nd place in individual category

Technical Skills

Game Development: Unity 3D (2024-2026), C#, Visual Scripting, Game State Management
Game Design & Mechanics: Puzzle Design, Combat Systems, Gameplay Mechanics, UI/UX Design
Level Design: Environment Creation, Puzzle Level Design, Story Flow Integration
3D Modeling & Assets: Blender, Asset Integration, Animation Implementation
Programming: C#, C, Python, Object-Oriented Programming
Tools & Platforms: Visual Studio, VS Code, Zimension Platform, Git
Soft Skills: Problem Solving, Creativity, Teamwork, Project Management, Communication
Narrative Design: Story Writing, Character Development, Dialogue Systems
